# Learning Apps

The new year and start of the Spring semester provides a great opportunity to share the launch of our Learning Apps Store inside of Isidore. The app store is available inside of the Lessons tool. To access the app store, click on the "Add Content" menu and then select "Add Learning App". There are currently two apps available for you to use; Knowledge Check and Flashcards. We have other learning apps in development and hope to share those with you soon.

Learn more about adding Learning Apps to Lessons.

Knowledge Check

The new Knowledge Check learning app allows you to create small quizzes, including multiple choice or true/false questions. Students can use knowledge checks to assess their knowledge after completing a reading or video, or to prepare for an upcoming test.

Read more about Knowledge Checks.

☑ Sea Star Knowledge Check

1. All sea stars have 5 appendages.   5 points
   ○ True
   ● False

[Submit] [Cancel]

Flashcards

The new Flashcards learning app allows you to create flashcard sets that include text, images, audio files, or videos. Students can use the flashcards to help learn important concepts. Using the sets is fun and works great on browsers or mobile devices.
