Previously, it was difficult to understand what you were seeing on the Lessons Reorder page. Enhancements have been made so that you can quickly identify what types of items are listed on the page, where section and column breaks occur, and which items you've moved and intend to delete. You may also preview all items on the page by clicking on the link for an individual item. Everything on the page is drag and drop, which provides a convenient way to reorder and organize items on your Lessons pages.
